

AZ Lottery Final Presentation

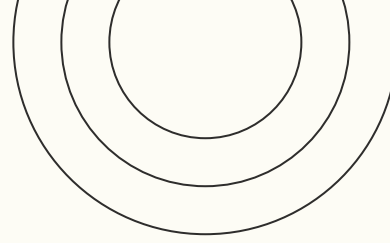

Lottery Loyalty Platform Segmentation and Sales Analysis

Team Members: Jojo Kim, Emma Pan, Aesha Pitaliya, Mia Tseng

Agenda

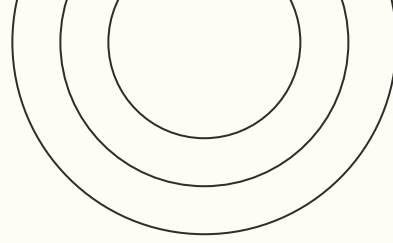

- Business Problem
- Project Plan
- Dashboards
- Game Preference Comparison
- Arizona Mid-tier Concentration
- Segmentations
- Recommendations

Business Problem

Current Challenges

- Limited data-driven understanding of loyalty program members
- Underutilization of vending machine sales data
- Reactive decision-making for marketing and inventory management

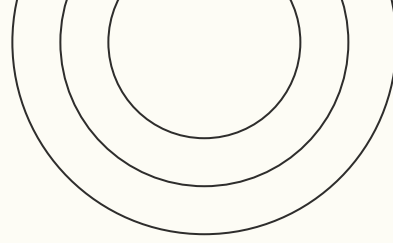

Business Problem

- Lack of a unified analytics framework to:
 - Segment loyalty members effectively
 - Optimize vending machine sales and inventory

Project Plan

Project Goal

- The goal of this project is to develop data-driven insights and actionable recommendations that improve loyalty member engagement and player segmentation for the Arizona Lottery

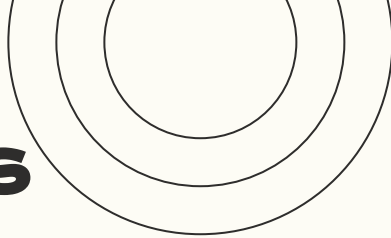

Scope

- Analysis of loyalty program data, retailer data, and product attributes
- Development of descriptive, predictive, and prescriptive analytics models; creation of dashboards and reports

Recommendations

Retain high-value players

- VIP programs, exclusive rewards, and personalized incentives

Increase play frequency

- Extending seasonal campaigns, adding off-season promotions, and targeted reminders

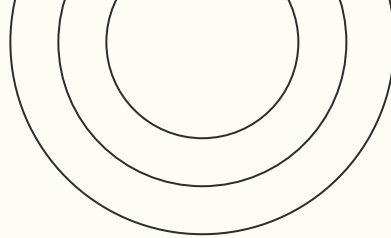

Drive cross-play & spending

- Game recommendations, bundles, and new game formats

Activate low-engagement players

- Simple incentives and timely notifications

Thank You
